TRAINING & PROJECTS

SMART ATM-Virtual Banking Experience
July 2023
- Developed an ATM simulator using **Java Swing, AWT**, and **MySQL**, providing a complete virtual banking experience.
- The system allows users to create and manage accounts, deposit and withdraw money, change PINs, print mini statements, and check balances.
- All user interactions are handled through a graphical interface, with real-time data storage and retrieval managed via **MySQL**

PIZZA SHOPPING APPLICATION
 September 2023
- Designed a Pizza App using **HTML, CSS, JS**
- It has features that include add to Cart , make payment(fake)
- Object are fetched using fetch API in **JSON** format and added dynamically in web page using **DOM** Manipulation

PLANT DISEASE DETECTION
March 2024
- Allows for detection of disease in bell pepper leaves
- Created the project using **Tensorflow** and implemented data cleaning, processing, modelling and testing
- Our initial experimentation with **CNN model** Yielded only 77% accuracy. Through iterative improvements, we achieved a final model with accuracy of 98.4%
